# Dreispitz Wall / Ceiling

by Herzog & de Meuron

Designed by Herzog & de Meuron for Artemide, the Dreispitz Wall/Ceiling luminaire brings the same double-emission geometry to surface-mounted applications, fixing directly to a wall or ceiling. A triangular central core houses the electronics, with tubular diffusers mounted to its flat sides for soft, uniform light distribution. Its modular design allows it to be combined with other Dreispitz elements to form larger compositions, suiting office, hospitality, and common-area applications. Constructed from partially recycled, easily dismantled materials, Dreispitz offers a strong energy balance through efficient, dynamic emission management via the Artemide App. Available in black, green, or silver finishes, in 90cm and 120cm lengths. Part of the Artemide Architectural Indoor collection.
