

DT NAVICULA/MED/WHITE/WHITE

## Navicula Pendant

by David Trubridge

Navicula is derived from nature, in this case from one of the many microscopic diatoms that float around in the oceans. The flowing, segmented form is shipped as kitset and assembled on site with push-in nylon clips. The thin curved pieces of CNC-cut bamboo plywood create a flowing structure that also casts magical patterns. It is lit from within with a row of LED pin-point lights. Available in three sizes and a wide variety of finish options.
