

Olo Wall Light

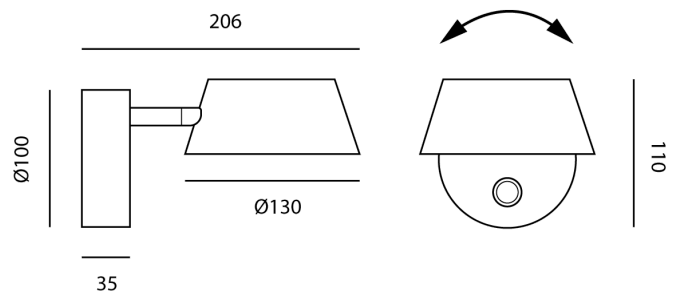

by Hui Lun Li

The OLO from SEED Design utilizes clean lines and circular forms to create a sleek contemporary wall light. OLO is unique in that the shade is also the light source. The innovative design embeds a 6.5W LED within the interior of the rotatable shade, creating an "invisible light source" effect. This also ensures that the light emitting surfaces are kept out of line-of-sight, reducing glare to a minimum. Equipped with a touch dimming button on base for simple operation. Available in matt black finish.
