

Mag Pendant

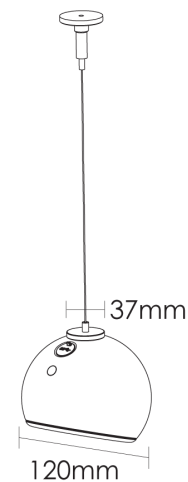

by

Mag is a portable, rechargeable LED light for the modern home. Mag attaches to its base through a strong magnetic contact, allowing the light to be adjusted to any angle while being easy to remove when it is needed elsewhere. Mag is equipped with a built-in 1.5W LED and features a 3-step dimmer switch. Powered by a rechargeable lithium battery which provides a up to 5hrs illumination on full power, or up to 20hrs on low. Rechargeable via a standard USB type-C cable. An impeccable build quality with a class III IP44 rating means Mag is water resistant and can be used as a temporary outdoor light for camping or the patio. Pendant lamp version includes the Mag light and hanging pendant base.
