

VI LT/VEGA/YELLOW/GREEN/BLUE GLASS

Vega Table Lamp

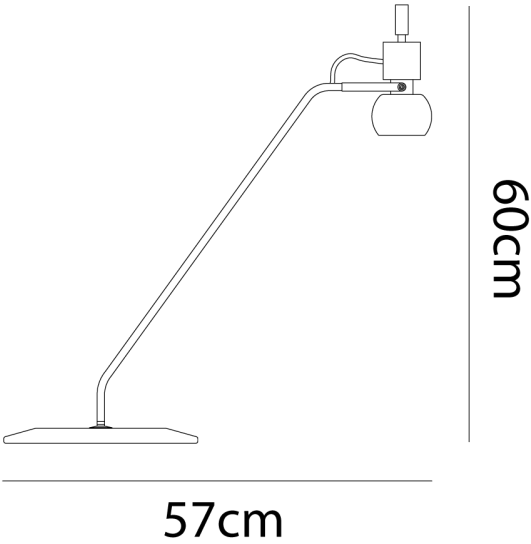

by Michele de Lucchi

Designed by Michele De Lucchi for Vistosi in 1982, the Vega table lamp bares many of the hallmarks of his Memphis period where De Lucchi rose to prominence. Vega is composed of atypical shapes which create it's unique form. Vega is offered in a standard white finish for versatile application, or in a bright multi-coloured finish characteristic of pure Memphis. This version of the Vega was revised in 2007 with De Lucchi himself with Alberto Nason to make the most of contemporary production methods.
