

NE A/RADIEUSE/GREEN

Applique Radieuse

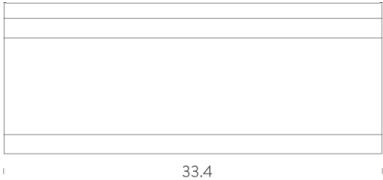

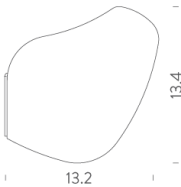

by Le Corbusier

In 1949, Le Corbusier conceived the Applique d'entree des appartments, a wall lamp of curved metal sheet to enlighten the entrances of the Unite d'Habitation in Marseille, the housing unit symbol of the Modern Movement in its architectural and urbanistic conception. Using a distinctive silhouette, the Master designed the paradigm of the wall lamp, giving it the maximum efficiency while hiding the light source. The light emission can be arranged as desired, downlight or uplight for direct or diffused light. The colours are the same as those adopted for the Unite d'Habitation: the iconic red, blue, white, orange and green.

Designer	Le Corbusier
Supplier	Nemo
Country	Italy
SKU	NE A/RADIEUSE/GREEN
Finish	Green

Product Dimensions

Materials	Aluminium	Source	2 x E27 40W (Max)	Emission	Indirect
Dimming	Dependent on globe
