

NE S/TITIA/MINOR/2700K/1-10V/BLACK

## Titia Minor Pendant

by Arihiro Miyake

The result of a considerable work of engineering, Titia Minor represents a leap into the future in the dematerialization and miniaturization of light sources, becoming part of the structure itself. A unique project in which a vacuum is filled exclusively by the light of the structure. The identical modules in recycled polymer are injection-moulded and equipped with quick couplings, creating a discreet silhouette. Available in matte black finish.
