

CT S/FIJI/GIG/BLACK/SKY-BLUE

Fiji Pendant

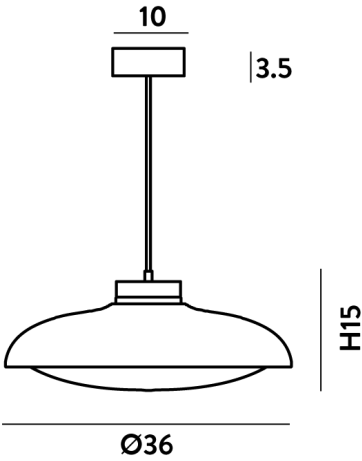

by Mandalaki

The concept behind the Fiji Pendant was to give light a form. A smooth elliptical glass shade cradles a frosted glass sphere, evoking a sense of depth while gently emitting light outward. The high power LED, optical system, wiring and fastenings are all housed within the CNC aluminium heatsink - an innovation by Mandalaki Studio which maximises aesthetic by compressing all mechanical and electrical functions within a single sophisticated component. Available in three sizes in a variety of finish combinations. Made in Italy by masters of glass Cangini & Tucci.
