RO S/OVERLAP/H1/3000K/WHITE

# Overlap Pendant

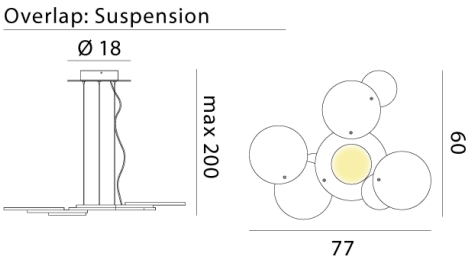

by Paolo Dell'Elce

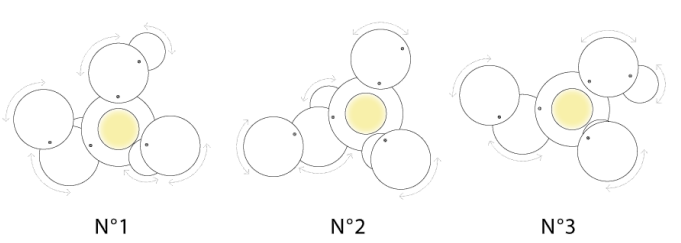

Overlap pendant takes it's name from the effect produced by it's overlapping of circular elements. Made entirely of aluminum and medium-density customization light panels. The central disk supports an LED source and the external disks arranged on different levels, producing an unobtrusive yet dramatic geometry. High output 34W 4000lm LED source with phase dimming. Available in matt white finish in 2700K or 3000K colour temperature.
