Copernico Pendant

by Carlotta de Bevilacqua

Copernico Suspension is a dynamic pendant light composed of concentric aluminium rings that rotate independently, allowing endless configurations of light and form. Designed by Carlotta de Bevilacqua and Paolo Dell'Elce, it offers both sculptural presence and functional flexibility. When open, Copernico casts a broad, ambient glow; when closed, it becomes a compact, minimalist disc. Lightweight and energy-efficient, it's a striking centrepiece that adapts to its surroundings with elegance and ease.
