Copernico Pendant

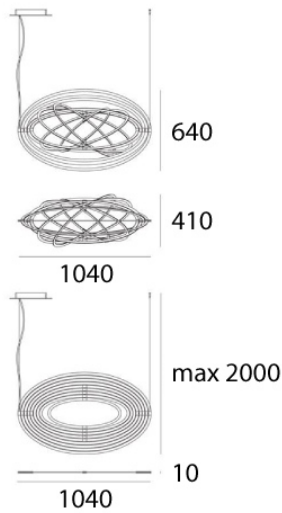

by Carlotta de Bevilacqua

Copernico Suspension is a dynamic pendant light composed of concentric aluminium rings that rotate independently, allowing endless configurations of light and form. Designed by Carlotta de Bevilacqua and Paolo Dell'Elce, it offers both sculptural presence and functional flexibility. When open, Copernico casts a broad, ambient glow; when closed, it becomes a compact, minimalist disc. Lightweight and energy-efficient, it's a striking centrepiece that adapts to its surroundings with elegance and ease.

Designer	Carlotta de Bevilacqua
Supplier	Artemide
Country	Italy
SKU	ART 1623010A
Finish	Aluminum

Product Dimensions

Materials	Aluminum
Output	3686lm
Dimming	Push

Source	30W LED
CRI	90
Notes	200cm max drop

Colour Temp	3000K
IP Rating	IP20
