ARCO BLOK/11w/BLACK-GREY

Blok Wall Light

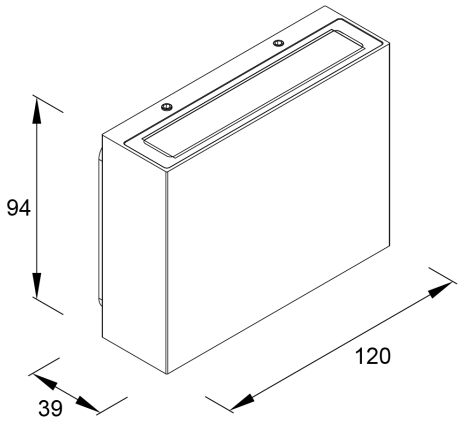

by

The Arcolight Blok Wall Light is a compact LED wall light that casts light up and down from a minimal square profile. It runs an 11W integrated LED at 3000K and delivers 744 lumens, with a CRI of 90 and colour consistency within 3 SDCM, so multiple fittings match across a run. Rated IP65, the Blok Wall Light suits exterior facades, entries and balconies as well as interior corridors, stairwells and hospitality spaces. It is phase cut dimmable and comes in textured black grey or textured white. Optional Blok Wall Light Covers fit over the module to change its scale and appearance, so one base fitting can be specified across a project in more than one look. The Blok Wall Light is part of the Arcolight collection, showcasing premium architectural lighting curated by Studio Italia.
