Squiggle Floor Lamp

by Paolo Rizzatto

Inspired by the "Neon structure" by Lucio Fontana for the 9th Triennale of Milan, Squiggle is a suspended tubular exoskeleton which contains an LED strip. A sequence of irregular hexagon-shaped holes allow light to escape the metal structure, generating varying geometrical shapes: broken curved lines, the infinity symbol, and concentric rings of various sizes. Floor lamp available in matt gold, black or white finish in 2700K or 3000K.
