

Coral Pendant

by David Trubridge

The Coral Pendant Light from David Trubridge is based on one of the geometric polyhedra that have interested David since he was a boy. The intricate form is made from just one single component repeated 60 times. Originally designed purely as an experiment, it only became a light later when David tried to find a use for it by putting a bulb inside. Coral was David's first lighting design which now is considered to be a design classic. The plywood finish can be all natural or painted creating a wide range of finish options. Coral is also available in 5 sizes for a wide variety of applications. Various sizes and colours can be arranged in cluster formations for powerful effect.
