## La Roche Wall Light

by Le Corbusier

Born from an existing system to illuminate large windows, La Roche was the first wall lamp conceived by Le Corbusier for his purist architectures: Villa La Roche and Pavillon de l'Esprit Nouveau. The iconic design has been updated with a LED lighting source with glass diffuser shaped on the original incandescent bulb. Produced by Nemo to celebrate a classic of lightness and function. Available in an IP45 for bathroom use in black or grey finish.

Designer	Le Corbusier
Supplier	Nemo
Country	Italy
