

Frequency Pendant

by Marcantonio Raimondi Malerba

Frequency is a linear LED lamp made of blown glass designed by Marcantonio Raimondi Malerba. Born from a desire to enhance the essence of light, designer Marcantonio wanted to capture the shape of a beam of energy travelling through space as a sculptural object. The result was Frequency, realised thanks to the skilful control of glass by Cangini e Tucci. Frequency exists in two versions, both hanging. The first can be installed horizontally, over a dining table, above a reception desk or office. The second is installed vertically, functioning like a floor lamp. Frequency, like all Cangini and Tucci lamps, is entirely handmade in Italy. Available in various glass and metal finish combinations. Frequency horizontal is available in a standard version (Horizontal 1) or with an adjustable wiring point (Horizontal 2).

Designer	Marcantonio Raimondi Malerba
Supplier	Cangini & Tucci
Country	Italy
SKU	CT S/FREQUENCY
Warranty	2yr commercial / 3yr residential
