

Spigolo Floor Lamp (2x LED Version)

by Studiocharlie

The SPIGOLO design is based on an extruded and tubular aluminium structure, connected with moulded ABS joints. Thanks to the joints, enabling the profiles to house LED sources, one can rotate 360 degrees in order to produce a directional direct or indirect lighting, screened by an opaline diffuser in polycarbonate. The floor version is designed as such to provide a virtual divider to ambiances. LED sources are dimmable and with warm tone. Please note that this version of the Spigolo floor lamp is an older model with 2x LED sources (8W + 12W) and 2000lm total output with a single orientable LED. The latest version of the Spigolo floor lamp found in our general catalogue has 3x LED sources (6+10+33W) with 2700lm total output and is available in 2700K or 3000K with 2x orientable LEDs.
