

Sol Floor Lamp

by Paolo Rizzatto

Sol floor lamp is characterised by it's luminous disk design, housing two devices optimized for light emission. With 96 LEDs directed downward and 128 LEDs directed upward, the light intensity can be independently adjusted for each direction. Special raster optics minimize glare while adorning the horizontal surfaces with a pattern of concentric squares. Concentric circle engravings aid in heat dissipation. Its simple, versatile design makes it adaptable for various applications. Available in a variety of finish options.

Designer	Paolo Rizzatto
Supplier	Rotaliana
Country	Italy
SKU	RO PT/SOL
Warranty	2yr commercial / 3yr residential
