

## Sol Floor Lamp

by Paolo Rizzatto

Sol floor lamp is characterised by its luminous disk design, housing two devices optimized for light emission. With 96 LEDs directed downward and 128 LEDs directed upward, the light intensity can be independently adjusted for each direction. Special raster optics minimize glare while adorning the horizontal surfaces with a pattern of concentric squares. Concentric circle engravings aid in heat dissipation. Its simple, versatile design makes it adaptable for various applications. Available in a variety of finish options.
