

Dreispitz Vertical Pendant

by Herzog & de Meuron

Designed by Herzog & de Meuron for Artemide, the Dreispitz Vertical Pendant applies the same double-emission geometry as the horizontal version, oriented to run along the vertical plane of a space. A triangular central core houses the electronics, with tubular diffusers mounted to its flat sides for soft, uniform light distribution. Individual units can be combined with horizontal elements to form larger graphic compositions, suiting office, hospitality, and common-area applications. Constructed from partially recycled, easily dismantled materials, Dreispitz offers a strong energy balance through efficient, dynamic emission management via the Artemide App. Available in black, green, or silver finishes, in 90cm and 120cm lengths. Part of the Artemide Architectural Indoor collection.

Designer	Herzog & de Meuron
Supplier	Artemide
Country	Italy
SKU	ART S/DREISPITZ/VERTICAL
Warranty	2yr commercial / 3yr residential
Size Options	120, 90
