

Empatia Table Lamp

by Carlotta de Bevilacqua, Paola di Arianello

Inspired by the timeless art of Venetian glass-blowing, Empatia table lamp is the result of a close collaboration between Artemide and master glass artisans. Each piece is individually crafted, celebrating the delicate balance between transparency and opacity to create a soft, glare-free glow. The glass diffuser is paired with a high-performance LED, designed separately to enhance thermal efficiency and light quality. A transparent light guide channels illumination seamlessly into the hand-blown glass, creating a luminous effect that beautifully enhances a space. Available in three sizes. Designed by Carlotta de Bevilacqua and Paola di Arianello and made in Italy.
