

Bonta Table Lamp

by Attila Veress and Davide Oldani

Bonta is a portable lamp that brings light, warmth, and a sense of occasion to the table. Crafted from white textured milk glass, its soft glow creates a relaxed, inviting atmosphere, perfect for shared moments. At its centre, a recessed top holds a hand-worked glass bowl, designed for serving food and encouraging conviviality. The bowl can be swapped with taller or wider versions, allowing for playful combinations of light and form. Each element of Bonta is made from artisan glass, with subtle variations in texture and colour that make every piece unique. Light and food interact in a delicate balance, blurring the boundaries between function and experience. Thoughtfully designed and beautifully executed, Bonta is more than a lamp-it's a celebration of connection.
