

Discovery Spot Pendant

by Ernesto Gismondi

Building on the Compasso d'Oro-winning Discovery, the Discovery Spot Pendant pairs Artemide's patented optical technology with directional accent lighting. The square and rectangular luminous panels can be hung vertically or suspended at any angle, producing comfortable, glare-controlled light with a UGR below 19. Set into a circular opening in the emitting surface, the Vector spot light, designed by Carlotta de Bevilacqua, can be oriented to highlight artwork, objects or architectural details. Diffused ambient light and focused accent light are brought together in a single fixture. The Discovery Spot Pendant is available in square and rectangular versions in a black finish. It features Tuneable White light with DALI and Artemide App control. A collaboration between Artemide co-founder Ernesto Gismondi and Carlotta de Bevilacqua, Discovery Spot shows the brand's blend of optoelectronic expertise and design culture. Made in Italy by Artemide.

Designer	Ernesto Gismondi
Supplier	Artemide
Country	Italy
SKU	ART S/DISCOVERY/SPOT
Warranty	2yr commercial / 3yr residential
Size Options	Rectangle, Square
